

UI Development | Masking and Clipping | Build a user interface element

Problem Statement: Design UI of making and clipping element using only HTML & CSS

User Stories

1. The making and clipping should look like the following mockup:-<https://dribbble.com/shots/9020337-Masking-and-Clipping>
2. Make sure your UI matches 90 percent as shown in link.
3. Innovation over the given UI are welcomed.
4. Make sure it is responsive

Important Considerations & Pointers

1. Create an index.html file for the HTML layout of the task.
2. Create a style.css file for the stylesheet instead of writing styles inside the HTML document.
3. Archive (Zip) the final folder and share it in the study group for review.
4. For using icons, refer to this instructional video on using Font-Awesome icons: <https://www.youtube.com/watch?v=8z7Oh1T3m30>
5. Feel free to reach out to me for any kind of help.
